Stocks of Grains

in All Positions

AUG 9 - 1965

CURRENT SERIAL RECORDS

July 23, 1965

GRAIN AND SOYBEAN STOCKS LOWER

Soybean stocks on July 1, 1965 were nearly one-fourth less than the record high of a year earlier. Wheat stocks were 9 percent below last year and the smallest July 1 total in 12 years. Holdings of the four feed grains totaled 79 million tons -- 17 percent less than both last year and average, according to the Crop Reporting Board. Although all wheat holdings were lower, durum stocks were 62 percent larger than a year earlier. Rye stocks were more than double the small July 1964 total, but flaxseed holdings totaled nearly one-fifth less than last year.

All Wheat in storage on July 1 totaled 819 million bushels, the smallest July 1 stocks in 12 years. July 1 stocks were 9 percent less than a year earlier and 37 percent below the 1959-63 average. The decline in stocks occurred in off-farm holdings which totaled 686 million bushels, 17 percent less than a year earlier. Farm stocks, at 133 million bushels, were 76 percent larger than July 1, 1964. July 1 stocks indicate a disappearance during the crop year -- July 1, 1964 to June 30, 1965 -- of 1,373 million bushels, 4 percent below the record 1963-1964 crop year disappearance.

Durum Wheat stocks on July 1 totaled 66.5 million bushels, 62 percent above a year earlier. Farm stocks, at 19.0 million bushels, were 10 times greater than the small July 1, 1964 holdings. Off-farm stocks, at 47.5 million bushels, were 21 percent larger. July 1 stocks indicate a disappearance during the crop year ended June 30, 1965 of 40.2 million bushels, compared with previous crop year disappearance of 56.2 million bushels.

Rye in storage on July 1, at 12.5 million bushels, was more than double the small July 1, 1964 holdings. Farm stocks total 2.7 million bushels, 59 percent above a year ago while off-farm holdings of 9.8 million bushels were nearly 3 times the year earlier stocks. About one-half of the total stocks were either Government owned or under Government loan.

Corn in storage on July 1 totaled 1,926 million bushels -- 19 percent less than a year earlier, 21 percent below average, and the smallest July 1 stocks since 1956. Current holdings indicate a disappearance of 910 million bushels during the April-June quarter, about the same as the past three years.

Farm stored corn totaled 1,265 million bushels, 17 percent less than last year's near record level. Corn under Government loan made up 46 percent of the farm stocks, about the same percentage as a year earlier. Off-farm stocks of 661 million bushels were 23 percent less than last year and the smallest total since 1955. Corn owned by or under loan to CCC made up 83 percent of the off-farm total compared with 88 percent a year ago.

Oat stocks in all storage positions on July 1 totaled 283 million bushels, down 32 million bushels from a year earlier and 18 million bushels less than average holdings. Declines from a year earlier were shown in both farm and off-farm stocks. Nearly one-third of the oats in all positions were owned by CCC or under Government loan. Disappearance during the April-June quarter at 190 million bushels was the lowest of record for this period since records began in 1943.

Barley stored in all positions on July 1 totaled 102 million bushels. This was 23 percent less than a year ago and the lowest level since 1954. The decline from last year occurred in both farm and off-farm holdings. Stocks owned by CCC or under Government loan represented about one-third of total stocks and were the smallest in recent years. Disappearance during the April-June quarter at 103 million bushels was 14 percent above average and was the largest disappearance recorded during this quarter since records began in 1943.

Sorghum grain stocks in all positions were 658 million bushels on July 1, 8 percent below a year earlier and 2 percent below average. Compared to last year, off-farm stocks were down 56 million bushels, but farm stocks declined only 1 million bushels. Disappearance of sorghum grain from all storage positions during the April-June quarter totaled 111 million bushels compared to 126 million bushels during the same period last year and average disappearance for the quarter of 106 million. Sorghum grain owned by CCC or under loan accounted for about 96 percent of all stocks.

* Included in other States to avoid disclosing individual operations.

1/ Includes stocks at Mills, Elevators and Warehouses, terminals, processors and those owned by Commodity Credit Corporation which are in bins and other storages under C.C.C. control.

2/ Off-farm total plus farm stocks.

Soybean stocks in all storage positions on July 1, 1965 totaled 131 million bushels, nearly one-fourth smaller than holdings a year earlier. The 10 percent increase in off-farm holdings was more than offset by a decrease from last year in farm stocks.

Soybeans owned by CCC or under loan, including purchase agreements, accounted for only 6 percent of the total stocks.

July 1 stocks indicate a disappearance during the nine month period October 1964 - June 1965 of 601 million bushels from a supply of 732 million bushels (carryover of 32 million plus 1964 production of nearly 700 million bushels). During the period 369 million bushels were crushed and about 174 million were exported. Soybeans used for seed and feed are expected to total about 40 million bushels.

Flaxseed stocks in all storage positions on July 1 totaled 10.8 million bushels, a decrease of 2.3 million bushels from holdings a year earlier. Off-farm stocks were responsible for all of the decrease -- with holdings 28 percent below a year ago. Farm stocks, which account for less than one-fourth of total stocks in all positions, were 70 percent larger than a year earlier. Flaxseed owned by CCC or under loan accounted for slightly over three-fifths of total stocks. Current stocks indicate a disappearance during the year ending June 30 of 26.7 million bushels from a supply of 37.5 million bushels. During this period crushings totaled 20.8 million bushels, exports 7.0 million bushels and approximately 2.0 million bushels were used for seed.
